

Privacy Policy

TextCipher Application

Effective Date: June 20, 2026

1. Introduction

Thank you for choosing to use TextCipher. This Privacy Policy is designed to help you understand how your information is handled when you use our text encryption and decryption application.

Our Commitment: TextCipher was created solely for educational purposes to demonstrate how text encryption and decryption algorithms function. We are committed to protecting your privacy by design.

2. Information Collection and Use

Our stance on data collection is simple: we do not collect any user data. When you use TextCipher, please be assured of the following:

- **No Personal Information:** We do not collect, store, or share any personal information (such as your name, email address, phone number, or contacts).
- **No Device Data:** We do not collect or track your device's data, IP address, location, or usage statistics.
- **No Audio Recording:** This application does not use your microphone and does not record any conversations or audio of any kind.
- **Local Processing Only:** All encryption and decryption processes happen entirely locally on your device. None of your inputted text or encrypted messages are transmitted to any external servers or third parties.

3. Device Permissions

TextCipher does not require or request any permissions from your device. Because the app operates entirely independently and locally, it does not need access to your camera, microphone, contacts, storage, or any other restricted device features.

4. Security

We value your trust in using our educational tool. Because TextCipher does not collect, transmit, or store any of your data, the risk of your data being compromised through our app is effectively nonexistent. However, please remember that keeping the physical device secure and choosing strong encryption keys remains your responsibility.

5. Children's Privacy

Because our application does not collect any personal information whatsoever, it is completely safe for users of all ages, including children under the age of 13. We do not knowingly collect personally identifiable information from anyone.

6. Third-Party Services and Links

TextCipher does not contain any advertisements, third-party tracking software, analytics software, or external links. It is a completely standalone application.

7. Changes to This Privacy Policy

We may update our Privacy Policy from time to time. Since the app does not collect user contact information, we cannot notify you directly of changes. Any updates will be reflected by a revised "Effective Date" at the top of this policy. We advise you to review the app store listing periodically for any changes.

8. Contact Us

If you have any questions, concerns, or suggestions regarding this Privacy Policy or the TextCipher application, please contact us at:
